

E-SPLOST 6 Expanding opportunities for pennies.

What can E-SPLOST do for our district?

SAFETY & SECURITY

Henry County Schools is committed to enhancing and upgrading safety and security measures. E-SPLOST VI will provide all schools with Security Access Controls to ensure buildings are secure.

TECHNOLOGY

Technology quickly becomes outdated and in need of a refresh approximately five years after being introduced. E-SPLOST VI funds will refresh the current 1:1 technology across the district and provide other necessary upgrades to support digital infrastructure and access for all students and staff.

TRANSPORTATION

Buses and modernized transportation maintenance facilities are essential to ensuring our students can get to and from school, as well as other learning opportunities and extracurricular activities outside of the school. Henry County Schools will replace 25 buses per year during the E-SPLOST collection period to modernize the fleet. And a new facility will be constructed to support bus maintenance and alleviate the overcrowded main facility which will also be renovated.

RESOURCES/INSTRUCTIONAL SUPPORT - GROWTH & REPLACEMENT

E-SPLOST funds can be used for instructional resource purchases, and this will be a focus of E-SPLOST VI. Additionally, the funds collected will support growth and replacement of key resources for fine arts, health/PE, and Career, Technical, and Agricultural Education courses

NEW CONSTRUCTION

The current E-SPLOST VI proposal includes the construction of one district-wide STEM High School, two elementary schools, a transportation facility, and a district administration building. The STEM high school would be open to any student in the district wishing to enroll there, while the two elementary schools ease population growth in targeted areas in the county. The new administration building will provide much needed space to alleviate overcrowding and cramped conditions at the current district administration building.

EXPANSIONS/MODIFICATIONS/ADDITIONS

Through a classroom utilization study, multiple schools were identified as needing extra space to accommodate current populations and future growth. Three high schools, three middle schools, and one elementary school will have their building footprint adjusted to expand classroom space to accommodate the growing student population.

SIGNAGE - DIGITAL SCHOOL MARQUEES

Each school will get a new communication tool to help keep their school communities informed. Electronic marquees will replace the current signage at the street entrance to each campus.

SCHOOL MAINTENANCE/SYSTEM UPGRADES

Routine upgrades for many schools, including new roofs, alarm systems, playground equipment, and energy management systems will be covered under the proposed E-SPLOST VI.
