

Quick Guide: Student Chromebooks

Chromebook Care

- Charge the device fully each night
- Keep the Chromebook in the district provided case at all times
- Keep food and drinks away from the Chromebook
- Only the Chromebook should be in the case

Monitoring the Chromebook

The GoGuardian Parent App provides parents and guardians to direct access of student online activity reports and lets pause internet access from 8pm until 7am during the school week. GAT Shield allows you to view the student's online activity, see what sites they are working on and much more.

Damage or Loss

If your Chromebook is damaged, a temporary "loaner" device will be checked out to the student while their device is repaired. Do not attempt to fix it yourself. If your Chromebook is lost, contact your school ITP as soon as possible.

The "EmpowerHCS" program is designed to support and enable this vision by providing the resources and support necessary for student and teacher success. As a component of this support, students in grades 3 - 12 will receive a Chromebook and access to a digital learning environment. We believe these tools will serve as yet another powerful learning resource in support of authentic learning experiences, 21st Century skills development (communication, collaboration, creativity, and critical thinking), and opportunities for students to demonstrate mastery of core Henry County Teaching and Learning Standards.
