

Six Categories of Technology

Categories Activity

- There are 6 categories of technology.
- Can anyone name them?
- ***Construction***
- ***Transportation***
- ***Energy/Power***
- ***Communication***
- ***Manufacturing***
- ***Bio-Related***
- Name some technologies and let's put them in the right category.
- Can you identify any jobs in these different categories?

Please take out a blank sheet of notebook paper

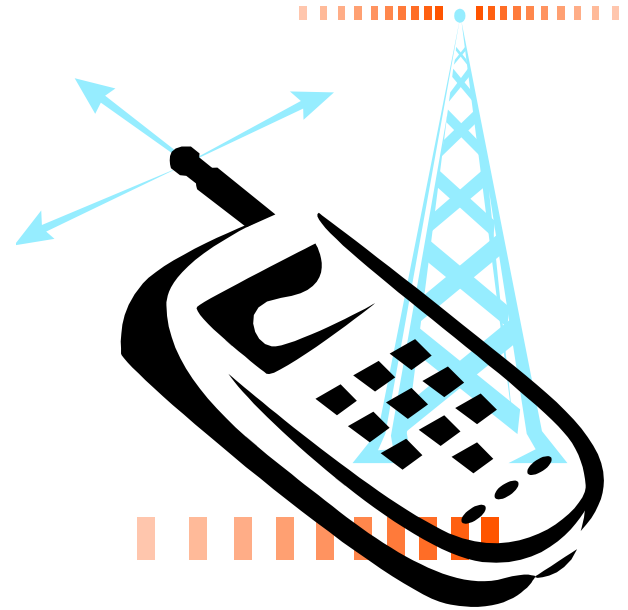

- Title your paper “*Categories of Technology*”
- Divide it into 6 sections:

- In each section you will define, give examples, and suggested careers for that category.

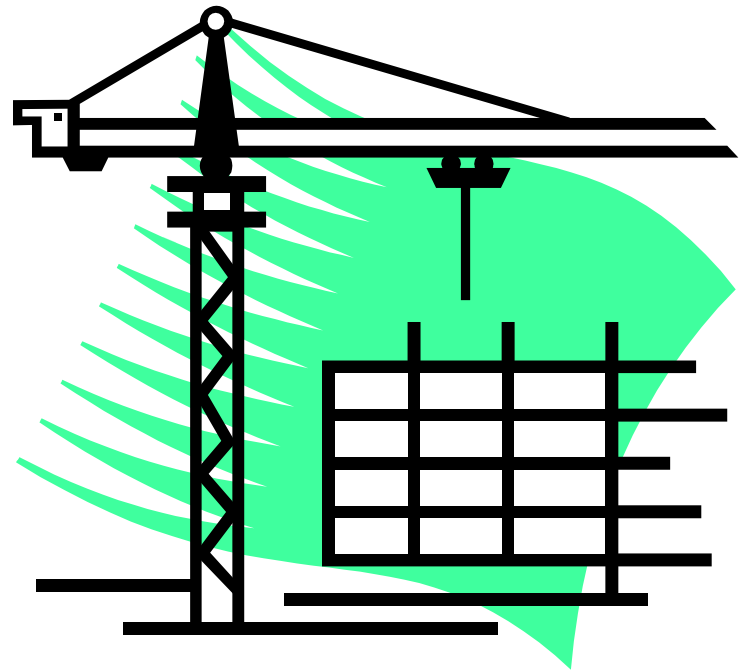

Communication

- The sending and receiving of messages.

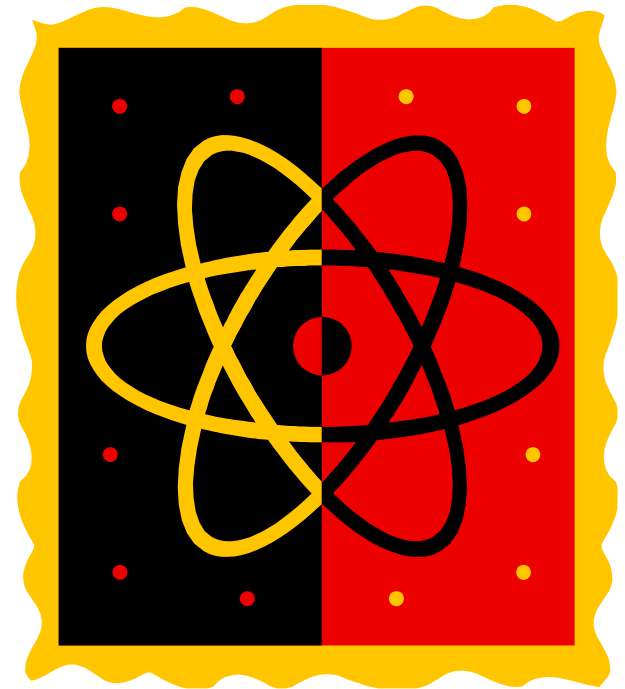

Construction

- The design and development of new buildings and structures

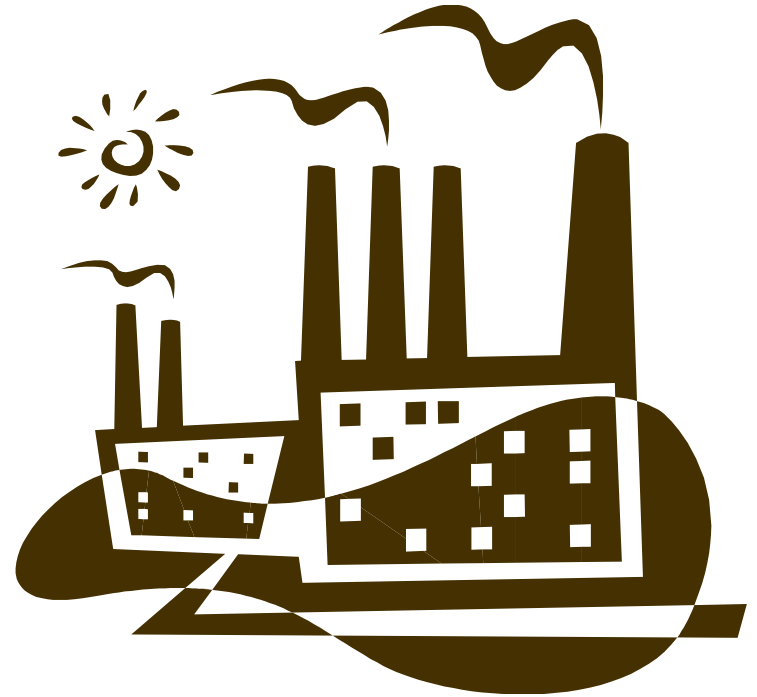

Energy

- The power/fuel of technology. Considered the “food” of technology. All other areas depend on it.

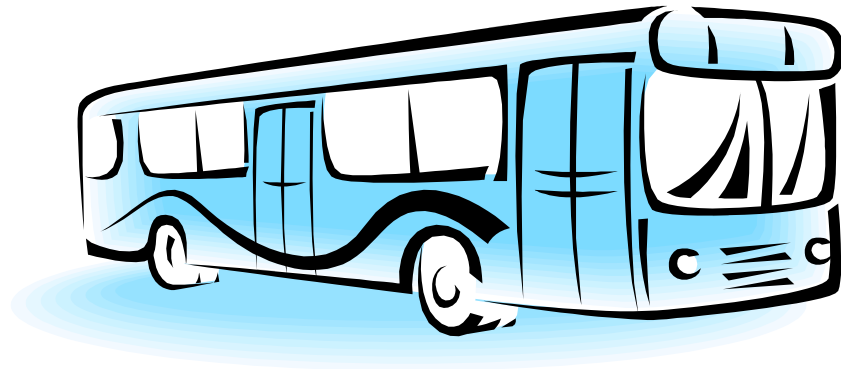

Manufacturing

- The design and development of products.

Transportation

- The movement of people or goods.
- Many methods: cars, trucks, airplanes, trains, pipelines

Bio-related Technology

- Technology related to life. This includes all technologies used in the medical field.

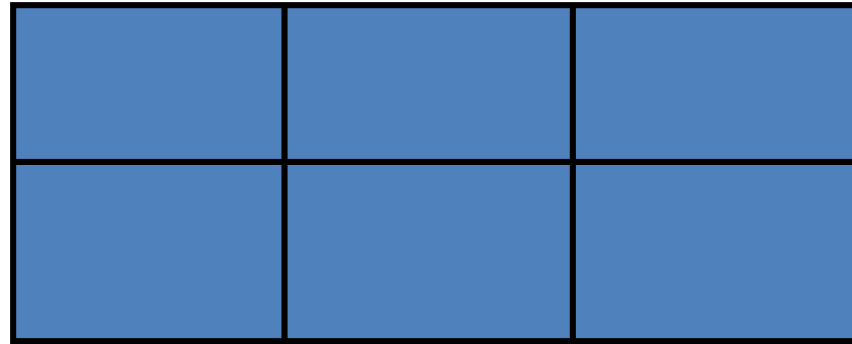

Create a PowerPoint

- Create a slide for each category
- Give the definition
- Find pictures of 3 examples
- Identify 2 career
- Use animation to make your PowerPoint interesting.

Make a poster

- Divide the provided paper into 6 sections

- Label each section as one of the 6 categories of technology. (*Communication, Construction, Transportation, Manufacturing, Energy/Power, Bio-Related*)
- Draw 3 pictures showing examples of each category
- Identify at least 1 career in each category.
