LET YOUR VOICE BE HEARD: TECHNOLOGY AT YOUR SCHOOL

Have a voice in how technology resources are purchased and allocated at your school! Your district has partnered with BrightBytes, a leading educational research organization, to better understand the impact that technology is having on student learning in your school. Your participation is key in the prioritization of learning initiatives within your school.

ABOUT THE FRAMEWORK

The CASE technology framework informs the research gathering and analytical processes used to improve the impact of technology on learning outcomes.

“I’ve dedicated the past decade to outlining a bold vision for modern, connected learning. Clarity is the best tool I’ve seen to bring those ideas to life in your school”

WILL RICHARDSON
Educational Innovator, Author, Speaker

WHY PARTICIPATE?

The Technology & Learning module combines input from administrators, teachers, and students to understand the environmental factors, skills, access levels and classroom factors that shape the impact of technology in your school. This information will be used to make purchasing decisions for technology in the coming months, as well as determine which professional development opportunities are most needed and wanted.

By contributing to the BrightBytes initiative, you have the ability to:

- Shape the professional development opportunities available to you and your colleagues
- Support the continuous drive towards modern, 21st century classrooms
- Help prioritize future technology initiatives
- Be a voice for change in your classroom, your school, and your district

We are committed to helping each of our students prepare for 21st century life, citizenship and work. This is a collaborative approach and very much need your input and perspective which will help us to continue to improve the quality of education in our school.
